

CSR impact report

Companies Act 2013, section 135 - annexure of supported projects
Generated 2026-09-08 14:03:06 UTC from Milan, Government of Jharkhand

Summary

Challenges supported: 1
Districts: Gumla

Confirmed by the citizen who reported the problem: 1. Partly confirmed: 0. Claimed by an implementer but NOT confirmed by any citizen: 0. Disputed by the citizen: 0.

Beneficiaries, confirmed outcomes only: 300. Beneficiaries attached to unconfirmed claims, reported separately and NOT included in the figure above: 0.

Why the two figures are separate. In Milan an outcome is counted only when the person who reported the problem confirms it was fixed. Publishing a solution does not count, funding it does not count, and an implementer saying they did it does not count. Any figure above that is marked unconfirmed is a claim awaiting that confirmation, and is presented as such here so that this annexure can be defended to an auditor rather than merely filed.

Projects supported

JH-2026-GUM-0001 - Crack spreading along the South Koel embankment near Basia

Gumla, Basia - WATER - NDMA hazard: FLOOD
Institution: BIT Sindri - supported since 2026-09-08 (accepted)
Artifacts: 4 (CC_BY | RESTRICTED) - reporters: 7 - beneficiaries: 300

IMPACT: CONFIRMED BY CITIZEN on 2026-09-08

Spend committed (INR): _____ Spend disbursed (INR): _____

Declared limitations

Spend figures are left blank because payment rails are not implemented in this release; the columns are provided for the filer. E-signature and MoU negotiation are likewise not implemented: the MoU is generated from a template and hashed into an append-only ledger so that the version both parties discussed cannot later be disputed.
